Subject: Letter of Recommendation for Hariprasath Chandrasekar

To Whom It May Concern:

I am writing this letter to support Hariprasath Chandrasekar's application to the Master of Science in Quantitative Economics and Finance program at the University of Luxembourg. I have known Hariprasath since the beginning of the Spring semester of 2019 as a student in my graduate-level Econometrics II course at the University of Texas at Arlington. The course covers the advanced traditional and recent cross-sectional, panel data, and limited dependent variable models. Thus, it is in that capacity that I have come to know him.

Hariprasath performed well in this course. He is efficient in collecting, cleaning, and analyzing large data sets. He is also efficient in using econometric or statistical software such as Stata and R. He is diligent and good at working with others. He communicates his thoughts clearly. He and his team members gave good presentations and provided insightful answers to the questions raised by the audience when they presented their class project.

I highly recommend **Hariprasath Chandrasekar** to your graduate program without any reservations. Please contact me at myasar@uta.edu if you'd like to discuss his attributes in more detail.

Sincerely,

Mahmut Yasar, Ph.D.
Professor of Economics
College of Business, Department of Economics
